Analyst Intern(Using Python) Lynaze Consult Private Limited ATM Machine Simulation using Python	Jan 2025- Feb 2025
Worked as a Python Analyst Intern, developing an ATM machine simulation to handle deposits, withdrawals, balance inquiries, and transaction history. Implemented PIN-based authentication for security, analyzed transaction data for usage insights, and used file handling and data structures to efficiently store and process records.	
<b>Technologies Used:</b> Python, File Handling, Data Structure, Conditional Statements, Loops.	

## PROJECTS

### COLLEGE WEBSITE

- Developed a responsive and user-friendly college website
- Built multiple pages (Home, About, Courses, Admission, Contact) [Link](#)
- Designed frontend using HTML, CSS, and JavaScript
- Implemented admission portal with student registration and validation
- Added contact forms and chatbot for user inquiries
- Used PHP and MySQL for backend functionality

### Employee Management System

- Web-based system to manage employee records
- Features include add, update, view, and delete employees
- Built using Django, MySQL and Bootstrap. [Link](#)

### Portfolio

- Personal portfolio website showcasing skills, projects, and experience
- Built with React.js, Django, Bootstrap.
- Includes sections for About, Projects, Skills, and Contact [Link](#)

## TECHNICAL SKILLS

**Programming Languages:** Python, JavaScript

**Frontend:** HTML, CSS, React.js, Bootstrap

**Backend:** Django, REST API

**Database:** MySQL

**Tools & Technologies:** Git, GitHub, VS Code
